-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 25 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### OFFICE ACTION

1. This action is responsive to communications: Amendment B, filed on 10/25/2004.
2. Claims 1-11, 13-23 are presented for examination. In Amendment, filed on 10/25/2004:  
claims 4, 6-9, 14 and 15 are amended;  
claims 16-23 are newly added.  
Applicant's remarks filed 10/25/2004 have been considered and are found persuasive

#### *Allowable Subject Matter*

Claims 1-3, 13, 15-17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 4-7, 14, 8-11, 18-23 are allowable.

#### *Claim Rejections - 35 USC § 112, second paragraph*

3. Claims 1-11, 13-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. The following terms lack antecedent basis:

- i. said program changed node - claim 1

- b. The claim language in the following claims is murky or not clearly understood:

- i. As per claim 1, line 14-15, it is not clearly understood what is meant by "a data transmitting signal for transmitting the stored new program data to a node for program changing", specifically, is 'a node for program changing' referring to the name of the node it self or an action result of the data transmitting signal?

The following is a suggestion of claim 1 and 2 as amended by the Examiner, the underlined section are the sections added and [] sections are the sections deleted by the Examiner, the

Applicant is advised to make corresponding changes to the remaining claims, i.e. claims 15-17 should be clarified for instance.

1. A program changing method for a network comprising at least two nodes that each have a program, said network further comprising a network management system (NMS) coupled to a first node of the nodes, the method comprising the steps of:

(a) transmitting, by the network management system (NMS), a new program data and a first control signal to said first node coupled to the network management system (NMS) disposed in the network separately from the nodes and configured to manage the changing of the programs of the nodes;

(b) allocating a fixed region in a memory within said first node in response to the reception of the new program data, storing the received new program data in the allocated fixed region, and replacing the program of said first node coupled to the network management system (NMS) with the new program data responsive to the first control signal;

(c) causing the network management system (NMS) to transmit to said [program-changed] first node a data-transmitting signal for transmitting the stored new program data to a second node [for program-changing], and transmitting, by the network management system (NMS), a second control signal to said second node for program-changing; and

(d) in response to the data-transmitting signal, causing said [program-changed] first node to transmit the stored new program data thereof to said second node for program-changing.

2. The method as set forth in Claim 1, wherein the method further comprising the step of (e) replacing the program of said second node [for program-changing] with the new program data received from said [program-changed] first node responsive to the second control signal and the step of (f) transmitting by the network management system (NMS) a data-transmitting signal to

the [program-changed] second node for transmitting a new program data to a next node coupled to [the program-changed] the second node.
